I Need

While no photos are ever part of the paintings, I can't very well paint those little freckles you love so much on your dog's nose if I don't know what they look like, so I need to work from good reference photos. The better pictures I have, the better painting I can deliver. Several good quality photographs + maybe a video call with the dog would be great for me to work from.

In a perfect world, the photos should be sharp, good lighting, close-up of the face, a straight on or 3/4 pose, at eye level, and looking at the camera. The more photos to choose from, the better. Animal eyes are highly reflective, and a flash can completely wash out the detail. If your pet looks sad in the photos provided, it can be tough to make him or her look happy.

Before I begin, we'll need to have some back and forth to ensure I can meet your expectations. This is a conversation, one that will help me deliver my best work. Acceptance of the commission is based on whether or not I can work with the reference photos.

Completion time will vary, depending on my workload, but usually it's around 4-6 weeks from receipt of approved reference photos. I require a 50 percent non-refundable deposit on all commissions, the remainder due upon completion.
